

National Center for Proteomics, University of Karachi, is offering individual short term training modules on techniques used in Proteomics related studies. Interested candidates should submit a request to the office of the Center with a brief CV. The following trainings will be available throughout the year.

1. Protein estimation
2. Native gel electrophoresis
3. SDS-PAGE
4. Gradient gel electrophoresis
5. 2D gel Electrophoresis
6. Tissue Culture techniques
7. HPLC/FPLC
8. RT-PCR and RT-qPCR
9. Western Blotting
10. Gel Chromatography
11. ELISA
12. Bioinformatics (Phylogenetic analysis, Sequence Alignments, BLAST, Structure Prediction, Ligand-Protein docking studies)
13. LC MS/MS analysis for protein identification
